

Ticker: HYDW

Strategy

Xtrackers Low Beta High Yield Bond ETF (the "Fund") seeks investment results that correspond generally to the performance, before fees and expenses, of the Solactive USD High Yield Corporates Total Market Low Beta Index (the "Underlying Index"). This index targets the higher quality issuers within the high-yield universe with lower beta relative to the market.

ETF performance and index history (from 1/11/18 to 3/31/19)

Source: DWS. Includes reinvestment of all distributions.

ETF performance (3/31/19)

	3-months	1-year	3-year	5-year	Since ETF Inception
ETF (at NAV)	5.84%	6.14%	—	—	3.86%
Market price returns	6.02%	6.05%	—	—	3.88%
Solactive USD High Yield Corporates Total Market Low Beta Index	5.90%	6.28%	—	—	4.06%
Solactive USD High Yield Corporates Total Market Index	7.49%	6.70%	—	—	4.13%

Performance quoted represents past performance and does not guarantee future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Shares are bought and sold at market price (closing price) not net asset value (NAV) and are not individually redeemed from the Fund. Market price returns are based on the midpoint of the bid/ask spread at 4:00 pm Eastern Time (when NAV is normally determined) and do not represent the return you would receive if you traded at other times. To obtain the most recent month-end performance data visit www.Xtrackers.com or call 855-329-3837.

Indexes are unmanaged; you cannot invest in an index. Index performance is gross of fees and assumes dividend reinvestment. Inclusion of fees would have reduced returns.

Top 10 Issuers (3/31/19)	
HCA	3.11%
Deutsche Telekom	2.78%
Charter Communications	2.73%
Altice USA	2.25%
MGM Resorts International	1.87%
Centurylink	1.81%
Cheniere Energy	1.78%
Dell Technologies Inc	1.74%
Centene Corporation	1.66%
Hainan Liberation Commonweal Foundation	1.62%

Holdings-based data is subject to change.

¹ Modified Duration to Worst is the measure of sensitivity of the price of a bond to a change in interest rates, assuming worst case scenario. Modified duration is the approximate percentage change in a bond's price for a 100 basis points change in yield, assuming that the bond's expected cash flow does not change when the yield changes.

² Yield to worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting.

³ Credit quality represents the higher rating of either Moody's Investors Service, Fitch Ratings or Standard & Poor's and is their opinion as to the quality of the securities they rate. Credit quality is measured on a scale that ranges from AAA (highest) to D (lowest). Credit quality does not remove market risk and is subject to change.

Xtrackers ETFs ("ETFs") are managed by DBX Advisors LLC (the "Adviser"), and distributed by ALPS Distributors, Inc. ("ALPS"). The Adviser is a subsidiary of DWS Group GmbH & Co. KGaA, and is not affiliated with ALPS.

Shares are not individually redeemable, and owners of Shares may acquire those Shares from the Fund, or tender such Shares for redemption to the Fund, in Creation Units only.

The brand DWS represents DWS Group GmbH & Co. KGaA and any of its subsidiaries such as DWS Distributors, Inc. which offers investment products or DWS Investment Management Americas, Inc. and RREEF America L.L.C. which offer advisory services.

Carefully consider the fund's investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-855-DBX-ETFS (1-855-329-3837), or by viewing or downloading a prospectus from www.Xtrackers.com. Read the prospectus carefully before investing.

Risks:

Investing involves risk, including the possible loss of principal. Bond investments are subject to interest rate, credit, liquidity and market risks to varying degrees. When interest rates rise, bond prices generally fall. Credit risk refers to the ability of an issuer to make timely payments of principal and interest. Investments in lower-quality ("junk bonds") and non-rated securities present greater risk of loss than investments in higher-quality securities. The fund seeks to mitigate the potential negative impact of rising Treasury interest rates by taking short positions in U.S. Treasury notes or bonds, or futures relating to those instruments. These short positions are not intended to mitigate credit risk or other factors that may have a greater impact on performance than rising or falling interest rates. The short positions may limit the potential positive impact of falling interest rates and there is no guarantee that the short positions will completely eliminate the interest rate risk of the long positions. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. This fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. Performance of the Fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with that fund. Please read the prospectus for more information.
