Deutsche Asset Management

With EUR 711 billion of assets under management (as of September 30, 2017), Deutsche Asset Management¹ is one of the world's leading investment management organizations. Deutsche Asset Management offers individuals and institutions traditional and alternative investments across all major asset classes.

Consider the Fund's investment objective, risk factors, and charges and expenses before investing. This and other important information can be found in the Fund's prospectus, which may be obtained by calling 1-855-DBX-ETFS (1-855-329-3837) or by viewing or downloading a prospectus at www.Xtrackers.com. Please read it carefully before investing.

DBX Advisors LLC (DBX) is the investment adviser to the Xtrackers ETFs, which are distributed by ALPS Distributors, Inc. (ALPS). DBX is an indirect, wholly-owned subsidiary of Deutsche Bank AG, neither of which is affiliated with ALPS.

DBKO RISKS: Investing involves risk, including the possible loss of principal. Stocks may decline in value. Foreign investing involves greater and different risks than investing in US companies, including currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. The fund's use of forward currency contracts may not be successful in hedging currency exchange rates changes and could eliminate some or all of the benefit of an increase in the value of a foreign currency versus the US dollar. Funds investing in a single industry, country or in a limited geographic region generally are more volatile than more diversified funds. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. This fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. Performance of the Fund may diverge from that of the Underlying Index due to operating expenses, transaction costs, cash flows, use of sampling strategies or operational inefficiencies. An investment in this fund should be considered only as a supplement to a complete investment program for those investors willing to accept the risks associated with the fund. Please read the prospectus for more information.
